Anita Walsmit Sachs

Observation with pen and brush

“The works in this publication once again show the extent of the attention and the elegance with which Anita Walsmit Sachs represents nature.”

Observation with pen and brush

Botanical artists have been illustrating the most beautiful flowers and plants, each in their own way, for many centuries. Like nature itself, the interpretations of it by the artist are endless in their variations. This can be beautifully observed in the collection of illustrated botanical books in Teylers Museum, for instance; you can page through them digitally, since they were recently made available on the website. This is, however, only a part of the framework within which the work of Anita Walsmit Sachs can be placed. Because of her extended experience in scientific botanical illustration, her drawings have the appearance of effortless. The fact is that, whereas a scientific botanical drawing has to be perfect in every detail, in a personal interpretation it is absolu-

tely essential to know what to leave out. This is the very essence of the personal work of Anita Walsmit Sachs.

The new interest in nature, in 'green' and everything related to it, has led to a gradual increase in the number of people interested in botanical art. The result is that old prints from botanical books, painted in, decorate the smooth walls of many a post-modern interior.

The works in this publication once again show the extent of the attention and the elegance with which Anita Walsmit Sachs represents nature. Therefore it is my desire that this publication will contribute to the further growth and flourishing of botanical art in the Netherlands.

Anita Walsmit Sachs

- Cahier series part 12
- Size: 22.5 x 22.5 cm
- 96 pages
- Illustrated : color
- Implementation: sewn , paperbound
- ISBN: 978 90 6109 4869
